

Keeping Our Planet Clean

Approximately 60% of trash we throw away today could be recycled.

Let's Recycle!

1. Circle or color all the things that can be recycled.
2. On the back of the paper, draw or write about a new invention you discover that's made of recycled bottles, cans, newspapers and other 'trash.'

Take-Home Family Challenge:

Talk to your family about recycling. What does your family recycle? Bring to school one thing your family recycles and talk to your classmates and teacher about how it can be used in your classroom.

Can you use it to make a hanging mobile, a creative bird feeder or a recess game?
